

Vishal Singh Kharyal

Software Engineer — React, Next.js, Node.js, FastAPI, Web Performance

<https://vishalsinghkharyal.online> vishalsinghkharyal@gmail.com Bengaluru, IN
[linkedin.com/in/vishalsinghkharyal](https://www.linkedin.com/in/vishalsinghkharyal) github.com/v5616 +91 8219466393

Profile

Full-stack engineer specializing in performance-critical React/Next.js frontends and Python backends. Proven track record: shipped AI dashboards improving data load times 30%, built real-time systems serving 1000s concurrent users, and mentored teams on scalable architecture.

Technical Skills

- **Frontend:** React.js, Next.js, TypeScript, TanStack Query, Redux, D3.js, Material-UI, Responsive Design, Bootstrap
- **Languages:** JavaScript, TypeScript, Python
- **Backend:** FastAPI, Node.js, Express.js, GraphQL, WebSockets, REST APIs
- **Testing & Quality:** Jest, cross-browser testing, CI/CD
- **AI & Automation:** LLMs (OpenAI APIs, Claude Code), GitHub Copilot, workflow automation (n8n)
- **Performance:** Code splitting, lazy loading, web vitals optimization, SSR/CSR trade-offs
- **Soft Skills:** Ownership Mindset, Cross-Functional Collaboration, Agile Communication
- **Impact Areas:** Web Performance, Scalable Architecture, Real-time Systems, AI-Assisted Development, Team Mentoring

Work Experience

APPLIED MATERIALS

Bengaluru, IN Apr 2024 - Present

Software Engineer

- Architected 3 production applications end-to-end (React, Next.js, GraphQL, FastAPI), managing full lifecycle from requirements to 200+ internal user deployments with 99.9% uptime. Built AI dashboards reducing data load times by 30%.
- Mentored 5 junior developers on full-stack practices, resulting in 40% faster feature delivery
- Architected a predictive UI component during an internal AI hackathon, increasing productivity by 70%
- Applied CI/CD improvements and automated testing workflows, reducing deployment time by 25% and catching bugs before production.
- Delivered responsive, pixel-perfect UIs for enterprise dashboards — reducing UI defects by 25% across browsers, with SSR/CSR/caching trade-offs made based on performance needs

PRAGMATIC PLAY

Noida, IN Jun 2023 - Apr 2024

Front-End Engineer

- Engineered real-time multiplayer casino games using React.js, Socket.io, and WebSockets, supporting thousands of concurrent users and increasing user engagement by 40%.
- Collaborated with product and design to ship WCAG-accessible UIs across 3 game titles, ensuring compliance on every release.
- Built and maintained 30+ reusable UI components using Storybook, reducing feature delivery time by 25%.
- Implemented live chat and socket-based interactions integrated across 3 game titles, increasing player session time by 50%

- Optimized mobile browser performance by reducing rendering latency by 35%, improving gameplay responsiveness.

ROWTH Autos

Chandigarh, IN Jan 2022 - Jun 2023

Front-End Engineer

- Refactored and improved 20+ reusable UI components using React.js, Redux, and TypeScript, improving maintainability and scalability across multiple modules.
- Built RESTful APIs and resolved high-severity UI issues, maintaining 99.9% uptime across production user-facing platforms.
- Collaborated cross-functionally with product, design, and backend teams to deliver 20+ production releases (averaging 2-week cycles) while maintaining 99.9% uptime across all user-facing platforms.

Selected Personal Projects & Open Source

AI Social Media Automation Agent

Personal Project – 2025

- Built an automated agent that monitors social media accounts and generates contextual replies in real time using LLM APIs (OpenAI), reducing manual response time and maintaining consistent engagement across accounts.

Scalable Analytics Dashboard (Next.js, SSR, Caching)

Tech: Next.js, Auth, GraphQL, State Management

- Built SSR-enabled analytics dashboard using Next.js and GraphQL, improving performance and handling large-scale data visualization.

Real-time Collaboration App

Tech: React.js, WebSockets, Auth, State Management

- Developed multi-user real-time editing with WebSocket sync.

Certifications & Courses

- Solved 150+ DSA problems (LeetCode)
- Completed GitHub Copilot & AI Pair Programming
- Vanderbilt's Prompt Engineering Specialization
- ChatGPT Prompt Engineering for Developers on DeepLearning.AI

Education

BCA - Lovely Professional University (LPU)

Jalandhar, IN 2018-2021

Relevant Courses: Web Development, Data Visualization, Time Series Forecasting GPA:8.0/10
